

CHERYL CHEN

San Francisco, CA | cherylchen4435@gmail.com | cherylchen.tech

EDUCATION

University of California, Irvine

September 2021 - June 2025

Major: Computer Science, B.S. | Minor: Informatics | GPA: 3.99

- **Relevant Coursework:** Project in Databases & Web Applications, Data Management & NoSQL; Computer Networks, Information Retrieval, Artificial Intelligence in Biology & Medicine, Health Informatics, DevOps
- **Technical Skills:** Python, Java, C++, SQL, HTML/CSS, JavaScript, TypeScript, Vue, React, Git, Figma
- **Extracurriculars:** Studied abroad in Taiwan, Grader for health data analytics course, Guitar

RELEVANT EXPERIENCE

Software Engineer | Johns Hopkins Applied Physics Laboratory | Laurel, MD

September 2025 - Present

- Delivered 40+ features and bug fixes for different web applications using **Vue, TypeScript, Python, and FastAPI**
- Designed and developed a prototype **analytics dashboard** for wastewater monitoring by translating project requirements into an interactive data visualization solution. Demoed to sponsor and secured additional funding.
- Improved **Python library** reliability by addressing technical debt, resolving bugs, and writing 100+ unit tests

Software Engineering Intern | Johns Hopkins Applied Physics Laboratory | Laurel, MD

June 2024 - August 2024

- Transformed and deployed data pipeline tool for harvesting scientific papers to retrieve, process, and store data in the cloud on a daily basis using **Python, Docker, MinIO, and Postman**. Optimized execution by 30x.
- Developed front/backend features involving integrating newly available data in a wikipedia-like web application running on a graph database using **Angular, TypeScript, SPARQL, and HTML/CSS**
- Automated and wrote 100+ UI tests with **Playwright** and implemented a testing stage in the project's GitLab continuous integration pipeline to encourage safe deployment and easier identification of code faults

Research Assistant | All of Us Research Program (UCI) | Irvine, CA

June 2023 - September 2023

- Utilized **Python, Pandas, and SQL** on a NIH health database to conduct a case-controlled breast cancer study
- Performed data retrieval/analysis and examined scientific literature to answer research questions

Scientific Computing Intern | California Academy of Sciences | San Francisco, CA

July 2022 - December 2022

- Implemented web scraper that scans research papers to find specimen citations for measuring museum's impact

VOLUNTEERING

Software Developer | Commit the Change | Irvine, CA

December 2023 - June 2024

- Developed full-stack with **React, PostgreSQL, Express.js, and HTML/CSS** in **Agile** workflow to deliver high-quality software for nonprofit supporting disadvantaged youth in STEM
- Collaborated with a team of developers and designers and built a schedule management system to aid in long-term planning and elevate the organization's capacity to efficiently manage more students, staff, and events

Community Outreach Committee Member | Women in Computer Science | Irvine, CA

January 2023 - June 2025

- Created tailored curriculum that encouraged underrepresented youth to explore CS
- Led, presented, and mentored at multiple technical and professional development workshops for high school girls

PROJECTS

Blossom Data | Optimizing Special Education Workflows

- Mobile app built with **React Native, PostgreSQL, Flask, and AWS** to streamline the creation of individualized education plans for special education students. Managed a team of 7 developers, serving as tech lead by assigning tasks and reviewing pull requests to ensure code quality and maintainability.

DNA Align | DNA Sequence Similarity Tool

- Application built with **JavaScript, React, and HTML/CSS** for computing similarities between two DNA sequences using dynamic programming algorithms with a user interface to facilitate streamlined data input
